Education

Nitte Meenakshi Institute of Technology
B.E in Electronics and Communication Engineering

2024 – 2028
CGPA: 9.57

Skills Technical Expertise

- **Generative AI Fundamentals**
Understanding of Generative AI concepts, AI-assisted workflows, and real-world AI applications.
- **Large Language Models (LLMs)**
Knowledge of LLM architecture, prompt-based interaction, and AI model capabilities.
- **Prompt Engineering**
Skilled in designing effective prompts for AI systems to improve response accuracy and task execution.
- **AI Application Development**
Basic understanding of building AI-powered applications using LLMs and prompt engineering techniques.
- **AI Problem Solving & Workflow Design**
Familiar with using AI tools to automate tasks, generate insights, and create user-focused intelligent solutions. “

Projects

HealthSync – AI-Powered Healthcare Management Platform

[Health Sync.ai](#)

- Developed an AI-powered healthcare platform that assists users with preliminary disease diagnosis based on symptoms.
- Integrated AI-based X-ray image analysis to support early detection and interpretation of medical conditions.
- Built personalized diet and exercise recommendation modules to promote healthier lifestyles based on user needs.
- Designed a centralized patient management system that enables doctors to securely maintain patient records and streamline clinical workflows.
- Focused on improving healthcare accessibility by combining intelligent diagnosis, medical imaging support, wellness recommendations, and digital patient record management in a single platform.

AI Research Agent

[Colab Project Link](#)

- Developed intelligent agent workflows using LangGraph for task automation.
- Implemented state-based execution and decision pipelines.
- Designed reusable templates for adapting across multiple use cases.

NPTEL Certification (IIT Madras): Introduction to Machine Learning

- Completed a 12-week online certification course offered by IIT Madras through NPTEL (Jan–Apr 2026).
- Gained foundational understanding of Machine Learning concepts including supervised and unsupervised learning.
- Studied key topics such as regression, classification, clustering, and model evaluation techniques.
- Secured a consolidated score of 60/100 and earned 4 academic credits.

Certifications

- Python for Machine Learning— Intellipaat
